Career Summary

Ellecktra - Web layout Designer, contractor

Responsible for web layout within the Agency's IT team. Main task is to convert the designs received in Adobe files into code, along with the graphic materials to be included in the sites, for new internal and external projects to the Company. The work modality is remote, having daily virtual meetings with the team and meetings with other areas for ongoing project issues. Using the gitLab repository for files. Languages used: HTML, CSS, JQuery, JS, BTS and PHP. Using FileZilla client to upload to test environment. From: 08/2023 to: Current.

Blue Sites Web and Freelancer - FrontEnd Web Developer

Design, Mockup and development front-end websites and landings. Code upgrading on websites and upgrading design. Use of servers (Apache cPanel). Languages used: JS, CSS, HTML, PHP and MySQL. Since: 05/2023 to: at the moment.

Infosis S.A.. FrontEnd Web Developer - temporary

Responsible for building architecture, layout, development and front-end programming of websites and landings for the Company. Code upgrading on websites built in WordPress platform. Database migrations. Use of servers (Apache cPanel and Hostinger). Languages used: JS, CSS, HTML, PHP and MySQL. Since: 03/2023 to: 05/2023

Industrias Pugliese SA (PSA SA). FrontEnd Web Developer & Designer

Working in the Marketing area I was responsible for designing and developing of internal clients mobile and desktop web sites. Responsibilities: - Daily upgrading, coding and improving on internal web platform. - Mock-ups designing and then translating into code. Always ensuring requirements such as performance, usability and security. - I have created a few back-end applications for improving processes and time optimization for employees. - Maintenance of code integrity and upgrading existing websites. - Developing projects in a test environment and then migrating them to the production environment. - Creation of technical best-practice documents. - Working closely with the Graphic Design Team. Used languages: JS, CSS, HTML and PHP. Since: 06/2021 - to: 04/2023.

Blue Sites Web. Founder, Full Stack Developer & Graphic Designer.

This is a personal project where I have designed the mock-ups and then I have made the development of the websites. Most of the projects that I have made consisted of developing only the front-end side. In those that I have also created the back-end side, I have developed them using languages such as MySQL and PHP. Besides, I have created and designed most of the images for those projects. Since: 02/2020.

Linde Gas Group Argentina SA. Logistics Analyst Sr. in Transport.

Planning and routes programming ensuring delivery effectiveness and optimizing kilometres for five branches of the Company along the country. - Analysis and tracking of the routes. - Daily, weekly and monthly reports. - Entry of suppliers invoices. - Purchase orders creation. Since 11/2009 to: 05/2019.
